affect the Nest Saton Rouge Parish Tourist Commission's shility to record, process, summarise, and report financial data consistent with the assertions of management in the financial statements. The reportable condition is described in the following wavenees

As important element in designing an internal accounting control pyrom that antegrand massis and vesconship vescen the reliability of the accounting velocity is the concept of segregation of responsibilities. Bo eve percent should be analyzed duties that would elive that percent to consist an error or perpetrate fraud and to the responsible (or any we of the following functions).

- Authorization of a transaction.
- 2) Necording of the transaction; and
- 3) Distody of assets involved in the transaction.

Due to the small size of the cognization, a proper segregation of duties is not passible with respect to react transactions. Management kelleves it is not practical or cost affective to correct this weakness. This is a repeat finding.
