INDEPENDENT AUDITOR'S REPORT

The Honorable Robert Jackson, Mayor And Members of the Board of Aldermen Town of Slaughter PO Box 293 Slaughter, LA 70777

I have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Slaughter, Louisiana as of and for the year ended June 30, 2021, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

My responsibility is to express opinions on these financial statements based on my audit. I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, I express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinions.

Opinions

In my opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Slaughter, as of June 30, 2021, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the budgetary comparison information, the schedule of the Town's proportionate share of net pension liability, and the schedule of the Town's contributions be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. I have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to my inquiries, the basic financial statements, and other knowledge I obtained during my audit of the basic financial statements. I do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

My audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Town's basic financial statements. The individual fund financial statements are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The schedule of compensation paid to board members, the schedule of compensation, benefits, and other payments to the agency head, and the justice funding schedule-collecting/disbursing entity are

the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In my opinion, the information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, I have also issued my report dated February 22, 2022 on my consideration of the Town of Slaughter's internal control over financial reporting and on my tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of my testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the Town of Slaughter's internal control over financial reporting and compliance.

Franklinton, LA February 22, 2022 Required Supplemental Information (Part I)

Management's Discussion and Analysis

The Town of Slaughter, Louisiana (the Town) is pleased to present its Annual Financial Statements developed in compliance with Governmental Accounting Standards Board Statement No. 34, Basic Financial Statements - Management's Discussion and Analysis - For State and Local Governments (GASB 34), as amended. The amendment of GASB 34, including the adoption of GASB Statement No. 63, Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position, and applicable standards are more fully described in Footnote 1 – Summary of Significant Accounting Policies.

The Town's discussion and analysis is designed to (a) assist the reader in focusing on significant financial issues, (b) provide an overview of the Town's financial activity, (c) identify changes in the Town's financial position, (d) identify any significant variations from the Town's financial plan, and (e) identify individual fund issues or concerns.

Since Management's Discussion and Analysis (MD&A) is designed to focus on the current year's activities, resulting changes, and currently known facts, please read it in conjunction with the Town's financial statements.

Financial Highlights

- As of June 30, 2021, the Town's assets exceeded its liabilities by \$2,045,217 (net position). The town reported a balance of \$137,052 in total unrestricted net assets.
- The most significant ongoing continuing revenue sources for governmental activities of the Town consisted of \$180,265 in sales taxes, \$68,057 in franchise taxes, \$40,332 in property taxes, and \$48,352 in occupational license fees. Charges for business-type activities of the utility fund were \$390,266 in gas charges and \$375,705 in water charges.
- The Town's significant expenditures in the current year for governmental activities included \$349,919 for general governmental activities, \$344,774 for police protection, \$109,625 for fire protection, and \$72,100 for street and sidewalk expenditures. Expenses for business-type activities of the gas and water departments totaled \$537,717.
- For the year ended June 30, 2021 the Town's bonds payable in long term debt was \$1,103,490 related to the Water Revenue Bonds payable. The Town paid principal payments in the amount of \$77,000.
- The Town entered into a capital lease agreement for the purchase of a pumper truck in the prior year. The amount of the lease payable is \$59,199. The Town recognized principal payments in the amount of \$7,207.

Overview of the Annual Financial Report

The financial statement focus is on both the Town as a whole and on the major individual funds. Both perspectives, government-wide and major funds, allow the user to address relevant questions, broaden a basis for comparison, and enhance the Town's accountability. The statements then proceed to provide an increasingly detailed look at specific financial activities.

The MD&A is intended to serve as an introduction to the Town's basic financial statements, which consist of three components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements.

Government-Wide Financial Statements

The government-wide financial statements are designed to provide readers with a broad overview of the Town's finances in a manner similar to a private-sector business. Governmental activities, which normally are supported by taxes and intergovernmental revenues, and business-type activities, which rely to a significant extent on fees and charges for support are presented in separate columns along with a total column for the primary government. If the Town determines that presentation of a component unit (which are other governmental units for which the Town can exercise significant influences or for which the Primary Government financial statements would be misleading if component unit information is not presented) is necessary to allow the reader to determine the relationship of the component unit and primary government, the component unit information is presented in a separate column of the financial statements or in a separate footnote. For the current fiscal year, the Town of Slaughter has no component units.

The Statement of Net Position presents information on the Town's assets and liabilities using the accrual basis of accounting, in a manner similar to the accounting used by private business enterprises. The difference between the assets and liabilities is reported as net position. Over time, the increases or decreases in net position and changes in the components of net position may serve as a useful indicator of whether the financial position of the Town is improving or deteriorating.

The Statement of Activities presents information showing how the Town's net position changed during the most recent fiscal year, focusing on both the gross and net costs of various activities, both governmental and business-type, that are supported by the Town's general tax and other revenues. This is intended to summarize and simplify the reader's analysis of the cost of various governmental services and/or subsidy to various business-type activities.

In both of the government-wide financial statements, the Town's activities are divided into two types:

Governmental activities - Most of the Town's basic services are reported here, including general government, public safety, streets and sanitation, health and welfare, and culture and recreation. These activities are financed primarily by property taxes, franchise taxes, sales taxes, fire insurance rebates, and fines.

Business-type activities - The Town charges a fee to customers to help it cover all of the cost of the services provided. The Town's water, natural gas, and sewer utility systems are reported in this section.

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule, if applicable, are payments-in-lieu of taxes and other charges between the government's enterprise operations. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Fund Financial Statements

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Town, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related and legal requirements. The Town uses two categories of funds to account for financial transactions: governmental funds and proprietary funds. Traditional users of governmental financial statements will find the fund financial statements presentation more familiar.

Governmental funds are used to account for most of the Town's basic services. However, unlike the government-wide financial statements, governmental fund financial statements focus on how money flows into and out of those funds and the balances that are left at year-end that are available for spending. These funds are reported using the modified accrual basis of accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the Town's general government operations and the basic services it provides. Governmental fund information helps to determine whether there are more or fewer financial resources that can be spent in the near future to finance the Town's programs.

Proprietary funds account for water, natural gas, and sewer utility services provided by the Town to its customers. Proprietary funds statements provide the same type of information as the government-wide financial statements, but the fund presentation provides more detail.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, there are differences in the information presented for government funds and for governmental activities in the government-wide financial statements. Review of these differences provides the reader of the financial statement's insight on the long-term impact of the Town's more immediate decisions on the current use of financial resources. Both the governmental fund Balance Sheet and the governmental fund Statement of Revenues, Expenditures and Changes in Fund Balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

Notes to the Financial Statements

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Government-Wide Financial Analysis

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. The following table provides a summary of the Town's net position for the current year as compared to the prior year.

Town of Slaughter's Net Position

	Governmen	tal Activities	Business-typ	oe Activities	Totals

Approximately seventy-three percent of the Town's net position reflects its investment in capital assets (land, buildings, equipment, infrastructure, and improvements, net of depreciation and the remaining debt held on those assets). These capital assets are used to provide services to citizens and do not represent resources available for future spending. Although the Town's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets cannot be used to liquidate these liabilities.

Approximately twenty percent of the Town's net position represents resources that are subject to external restriction on how they may be used. The Town's restricted net position primarily consists of fund balances restricted by legislation, capital projects funds, grants, and other specified purposes in governmental activities and cash reserves required for customer deposits in business-type activities net of corresponding liabilities. The Town's unrestricted net position was seven percent of the Town's net position.

At the end of the current fiscal year, the Town was able to report positive balances in all three categories of net position, for governmental activities. The unrestricted net position for business-type activities had a deficient of \$213,456 due to the implementation of GASB 68 and 71. The Town's activities decreased its

total net position by \$1,520, with governmental activities decreasing net position by \$78,019 and business-type activities increasing net position by \$76,499.

In order to further understand what makes up the changes in net position, the table following provides a summary of the results of the Town's activities for the current year as compared to the prior year. An analysis of the primary sources of these changes follows the table.

Governmental Activities

The Town's governmental net position decreased \$78,019 as compared to the prior fiscal year change in net position of \$58,450. The most significant factor in this change in net position is a decrease in revenues of \$106,794 and a decrease of expenditures of \$23,325.

Charges for services decreased by thirty-six percent or \$66,879. Capital grant revenues decreased forty-eight percent or \$102,679. Operating grants increased \$28,218. Taxes increased \$22,089 or eleven percent. Franchise fees increased five percent or \$3,077.

General government expenditures decreased ten percent or \$39,213. This was due to a decrease in professional services. The police department expenditures increased twenty percent or \$58,211. This was due to an increase in retirement expense related to GASB 68, insurance, and supplies. The fire department expenditures decreased nineteen percent or \$26,278. This was due to a decrease in salaries. The expenditures in the streets and sidewalk funds decreased eighteen percent or \$16,045. This was due to a decrease in street expenses and supplies.

The Town recorded a capital transfer of \$9,862 as revenue. The Town purchased a pumper truck in 2018. The funds for the truck were received by the Slaughter Volunteer Fire Department, Inc. through a Pennington Foundation grant for \$350,000. The Parish-Wide East Feliciana Fire Protection District (Slaughter station funds) paid \$52,924 towards the cost of the truck. The Town entered into a capital lease agreement as the lessor for the remainder of the balance (\$80,000).

Business-Type Activities

Charges for water and gas sales decreased one percent or \$10,429. Expenditures for the water department increased \$43,733 or thirteen percent. Expenditures for the water department decreased \$18,179 or five percent. Gas expenditures decreased \$27,496 or twelve percent. Water expenditures decreased due to a decrease in materials, supplies, and repairs in maintenance. Gas expenditures decreased due to a decrease in the retirement expense. This is due to GASB 68.

Fund Financial Analysis

As noted earlier, the Town uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental Funds

The focus of the Town's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the Town's financing requirements. In particular, unreserved fund balance may service as a useful indicator of the Town's net

resources available for spending at the end of the year. At the end of the year, the Town's governmental funds reported combining ending fund balances of \$574,487. Fund balance was as follows: restricted for streets and sidewalks \$142,048, assigned for police protection \$33,858, and unassigned \$398,581.

This represents an increase of \$31,527 on all governmental funds from the prior year's ending fund balance. The General Fund is the chief operating fund of the Town. At the end of the current year, the total fund balance for the General Fund was \$432,439. All funds had a positive ending fund balance.

Proprietary Funds

The Town's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

Governmental Fund Budgetary Highlights

There were no other funds that had actual revenues and other sources under budgeted resulting in unfavorable variances greater than five percent in accordance with the Local Government Budget Act for the fiscal year ended June 30, 2021. The Town's special revenue fund expenditures and other uses were over budget resulting in unfavorable variances greater than five percent.

Revenues in in the general fund were over budget by 3%. Revenues in the street and sidewalks fund were under budget by 59%. The expenditures in the general fund were over budget by 2%. The expenditures in the streets and sidewalks fund were over budget by 47%.

Capital Assets

The Town's capital assets for its governmental and business-type activities for June 30, 2021 amounts to \$2,734,812 (net of depreciation). The following table provides a summary of the Town's capital assets (net of depreciation) at the end of the current year as compared to the prior year.

Significant capital additions for the year ending June 30, 2021, consisted a drilling rig for \$15,000, a new computer system for \$30,921, radios for the fire department for \$20,164, a colorimeter for \$1,527 for the water system, and a 2" bore on a gas main for \$11,921. Depreciation expense for governmental funds was \$183,019 and for enterprise funds was \$90,210.

Long-Term Debt

At June 30, 2021, the Town had total debt outstanding of \$1,242,689 Of this total, \$87,496 is due within one year and \$1,155,193 is due within greater than one year. The following table provides a summary of the Town's outstanding debt at the end of the current year as compared to the prior year.

Other Factors Affecting the Town

The Town of Slaughter's management approach is conservative. When possible, the Mayor and Aldermen attempt to provide services for the Town based on existing revenues and to borrow for long-term projects only when absolutely necessary, actively pursuing grant funds to minimize the cost of major projects. The Town is facing increasing costs and has an obligation to its citizens to maintain or increase the level of services being provided.

Contacting the Town's Financial Management

This financial report is designed to provide the Town's citizens, taxpayers, creditors and investors with a general overview of the Town's finances and show the Town's accountability for the money it receives. If you have questions regarding this report or need additional information, contact the Town at 337 Church St., Slaughter, LA 70777. The phone number for the Town is (225) 654-4278.

TOWN OF SLAUGHTER, LOUISIANA BALANCE SHEET

RECONCILIATION OF THE GOVERNMENTAL FUNDS BALANCE SHEET TO THE GOVERNMENT-WIDE STATEMENT OF NET POSITION JUNE 30, 2021

Total Fund Balances - Total Governmental Funds	\$ 574,487
Amounts reported for governmental activities in the Statement of Net Position are different because:	
Capital assets used in governmental activities are not current financial resources and, therefore, are not reported in the Governmental Funds Balance Sheets. This is the capital assets, nets of accumulated depreciation, reported on the Statement of Net Position.	1,400,078
Long-term liabilities of governmental activities do not require the use of current financial resources and, therefore, are not reported in the Governmental Funds Balance Sheet. These are the long-term liabilities of the governmental activities:	
Lease Payable	(59,199)
Net pension liability Deferred outflows and inflows of resources related to pensions are applicable to future periods and, therefore, are not reported in the governmental funds.	(50,150)
Deferred outflows of resources related to pensions	39,290
Deferred inflows of resources related to pensions	 (58,348)

TOWN OF SLAUGHTER, LOUISIANA RECONCILIATION OF THE STATEMENT OF REVENUES EXPENDITURES AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITES YEAR ENDED JUNE 30, 2021

Net Change in Fund Balances - Total Governmental Funds

Amounts reported for governmental activities in the Statement of Activities are different because:	\$ 31,527
Governmental funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which depreciation charged differed from capital outlay in the current period.	
Capital outlays recoded as expenditures in governmental funds Depreciation not reported in governmental funds	62,210 (183,019)
Capital lease proceeds provide current financial resources to Governmental Funds, but issuing debt increases long-term liabilities in the Government-Wide Statement of Net Position. Repayment of capital lease principal is an expenditure in the Governmental Funds, but the repayment reduces long-term liabilities in the Government-Wide statements.	
This amount represents capital lease principal payments during the current period.	7,207
Governmental funds report pension contributions as expenditures. However, in the Statement of Activities, the cost of pension benefits earned net of employee contributions is reported as pension expense. This is the amount by which pension contributions charged differed from the actuarial cost of benefits.	356
Non employer contributions to cost sharing pension plan	3,700
Change in Net Position of Governmental Activities	\$ (78,019)

Notes to the Financial Statements

INTRODUCTION

The Town of Slaughter, Louisiana (hereafter referred to as the Town) was created under the provisions of the Lawrason Act, La. Revised Statute 33:321-463, in 1960. Therefore, it operates under a Mayor-Board of Aldermen form of government.

The Town was incorporated under the provisions of the Lawrason Act. The Town operates under the Mayor-Board of Aldermen form of government. The Mayor and five Alderpersons are elected at large every four years by the citizens of the Town. They are compensated for their services.

The Town provides police and fire protection, services to maintain or develop streets, sidewalks, drainage, and sanitation, general and administrative services, and utilities services for area residents. It currently serves approximately 456 utility customers and employs 14 persons (not including the mayor and board members).

Governmental Accounting Standards Board (GASB) Statement No. 14, as amended, establishes criteria for determining the reporting entity and component units that should be included within the reporting entity. Under provisions of this statement, the Town is considered a primary government, since it is a local special purpose government that has a separately elected governing body. Under provisions of this statement, there are no component units of the Town.

1. Summary of Significant Accounting Policies

A. Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all nonfiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, a primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

These financial statements are presented in accordance with GASB Statement No. 34, Basic Financial Statements, Management's Discussion and Analysis, for State and Local Governments, as amended by GASB Statements described in the following paragraphs. Statement No. 34 established standards for financial reporting, with presentation requirements originally including a statement of net assets (or balance sheet), a statement of activities, and a statement of eash flows. The definition and composition of these statements, as originally defined in GASB Statement No. 34, are as amended by GASB Statements included in the following paragraphs. The Town has also adopted the provisions of GASB Statement No. 33, Accounting and Financial Reporting for Nonexchange Transactions that require capital contributions to the Town to be presented as a change in net position.

GASB Statement No. 63, Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position, effective for financial statement periods ending after December 15, 2012, provides guidance for reporting deferred outflows of resources, deferred inflows of resources, and net position in a statement of financial position and related disclosures. Concepts Statement No. 4, Elements of Financial Statements, introduced and defined Deferred Outflows of Resources as a consumption of net assets by the government that is applicable to a future reporting period, and Deferred Inflows of Resources as an acquisition of net assets by the government that is applicable to a future reporting period,

respectively. Previous financial reporting standards do not include guidance for reporting those financial statement elements, which are distinct from assets and liabilities. GASB Concepts Statement 4 identifies net position as the residual of all other elements presented in a statement of financial position. This Statement amends the net asset reporting requirements in Statement No. 34, Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments, and other pronouncements by incorporating deferred outflows of resources and deferred inflows of resources into the definitions of the required components of the residual measure and by renaming that measure as net position, rather than net assets. The definition and reporting of net position is further described in Footnote J – Net Position and Fund Equity. As required by the Governmental Accounting Standards Board (GASB), the Town implemented GASB Statement No. 63 during the year ending June 30, 2012. The Town had deferred outflows and deferred inflows of resources related to pension of \$69,523 and \$104,399, respectively, at June 30, 2021.

The Town has also adopted GASB Statement No. 65, *Items Previously Reported as Assets and Liabilities*. This Statement establishes accounting and financial reporting standards that reclassify, as deferred outflows of resources or deferred inflows of resources, certain items that were previously reported as assets and liabilities and recognizes, as outflows of resources or inflows of resources, certain items that were previously reported as assets and liabilities. See *Footnote I – Long-Term Obligations*.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are presented as separate columns in the fund financial statements.

B. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period if they are measurable and available. Only the portion of special assessment receivable, if any, due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. Substantially all other revenue items are considered to be measurable and available only when cash is received by the government.

The Town reports the following major governmental funds:

The General Fund is the Town's primary operating fund. It accounts for and reports all financial resources not accounted for and reported in another fund.

The Town reports the following major proprietary funds:

The Enterprise Fund reports activity for which a fee is charged to external users for goods or services. The Enterprise Fund of the Town provides gas, water, and sewer utility services.

Additionally, the government reports the following fund types:

Special Revenue Funds account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specific purposes other than debt service or capital projects. For the current fiscal year, this included one major fund.

The *Debt Service Funds* account for and report financial resources that are restricted, committed, or assigned to expenditure for principal and interest. For the current fiscal year, the Town did not have debt service funds.

The Capital Project Funds account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays including the acquisition of capital facilities and other capital assets. For the current fiscal year ended, the Town did not have capital project funds.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule, if applicable, are payments-in-lieu of taxes and other charges between the government's enterprise operations. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as program revenues include 1) charges to customers or applicants for goods, services, or privileges provided; 2) program-specific operating grants and contributions; and, 3) program-specific capital grants and contributions. Internally dedicated resources are reported as general revenues rather than as program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the proprietary funds are user charges for the services provided by the enterprise funds. Operating expenses for enterprise funds and internal service funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

When both restricted and unrestricted resources are available for use, it is the Town's policy to use restricted resources first, then unrestricted resources as they are needed.

When restricted, committed, assigned, or unassigned fund balances are available for use, the Town considers amounts to have been spent first out of restricted funds, then committed funds, then assigned funds, and finally unassigned funds as needed, unless it has been provided for otherwise in the restriction, commitment, or assignment action.

C. Deposits and Investments

The Town's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition. Under state law, the Town may deposit funds in demand deposits, interest bearing demand deposits, or time deposits with state banks organized under Louisiana law or any other state of the United States, or under the laws of the United States.

Investments for the Town are reported at fair market value. The state investment pool, LAMP, operates in accordance with state laws and regulations. The reported value of the pool is the same as the fair value of the pool shares. Investments are limited by Louisiana Revised Statute (R.S.) 33:2955 and the Town's investment policy.

D. Receivables and Payables

Activity between funds that is representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by nonspendable fund balances in applicable governmental funds to indicate that they are not expendable available financial resources.

All trade and property tax receivables are shown net of an allowance for uncollectible amounts.

E. Ad Valorem Taxes

Ad valorem taxes attach as enforceable liens on all applicable property on February 28th of each year. Taxes are levied and are billed to taxpayers in November of each year. Property taxes are levied on a calendar year basis and become due on January 1 of each year. The following is a summary of authorized and levied ad valorem taxes:

	Authorized	Levied	Collected
	_Millage	Millage	Millage
General Corporate Purposes	4.49 Mills	41.974	40.332

The Town bills and collects its own property taxes using the assessed values determined by the tax assessor of East Feliciana Parish. During the year ended June 30, 2021, taxes of 6.19 mils were levied on property with assessed valuations totaling \$9,348,367 and were dedicated for general purposes.

F. Sales Taxes

The Town receives 4.92% and 3.8181% of East Feliciana Parish sales tax collections for the General Fund and the Special Revenue Fund respectively. These proceeds (\$100,732 for the General Fund and \$78,173 for the Special Revenue Fund) are dedicated for the purpose of maintenance, repairs, and upkeep of the streets and sidewalks in the Special Revenue Fund and for general operating expenditures in the General Fund.

G. Restricted Assets

Certain proceeds of the enterprise fund revenue bonds, as well as certain resources set aside for their repayment, are classified as restricted assets because their use is limited by applicable bond covenants. Additionally, funds held for customer's meter deposits are also classified as restricted assets.

Certain amounts shown as governmental restricted assets are to be used for specified purposes, such as servicing general obligation bond debt, construction of capital assets, and police seized assets. Such assets have been restricted by bond indenture, law, or contractual obligations.

H. Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements, as well as in the proprietary fund financial statements. Capital assets are capitalized at historical cost or estimated cost if historical cost is not available. Donated assets are recorded as capital assets at their estimated fair market value at the date of donation. The Town maintains a threshold level of \$500 or more for capitalizing capital assets.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed.

All capital assets, other than land, are depreciated using the straight-line method over the following useful lives:

Description	Estimated Lives
Buildings & Improvements	20 - 40 Years
Machinery and Equipment	5 - 15 Years
Office Furniture and Equipment	5 - 10 Years
Vehicles	5 - 10 Years
Infrastructure	20 - 40 Years
Gas System	20 - 40 Years
Water System	20 - 40 Years
Sewer System	20 - 40 Years

I. Compensated Absences

Vacation and sick leave are recorded as expenditures of the period in which they are paid. Employees earn vacation and sick leave at various rates depending upon length of employment. Vacation must be taken in the year earned and may not be carried over. Although sick leave is available for employees when needed, it does not vest nor is it payable at termination of employment.

J. Long-Term Obligations

In the government-wide financial statements and the proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts are amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Issuance costs, whether or not withheld from the actual debt proceeds received, are now expended in the period incurred under GASB 65.

The Town has implemented GASB Statement No. 65, *Items Previously Reported as Assets and Liabilities*, and with the implementation of GASB 65, the recognition of bond-related costs, including the costs related to issuance and refunding of debt, were revised. This standard was intended to complement GASB Statement No. 63 *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position*. Bond issuance costs, whether or not withheld form the actual debt proceeds received, are now expended in the period incurred under GASB 65.

In the fund financial statements, governmental fund types recognize bond premiums and discounts as well as bond issuance costs during the current period. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

K. Net Position and Fund Equity

GASB Statement No. 34, Basic Financial Statements, Management's Discussion and Analysis, for State and Local Governments, required reclassification of net assets into three separate components. GASB Statement No. 63, Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources,

and Net Position, revised the terminology by incorporating deferred outflows of resources and deferred inflows of resources into the definitions of the required components of the residual measure and by renaming that measure as net position, rather than net assets. GASB Statement No. 63 requires the following components of net position:

- Net Investment in Capital Assets Component of Net Position The net investment in capital assets component of net position consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets. Deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of those assets or related debt also should be included in this component of net position. If there are significant unspent related debt proceeds or deferred inflows of resources at the end of the reporting period, the portion of the debt or deferred inflows of resources attributable to the unspent amount should not be included in the calculation of net investment in capital assets. Instead, that portion of the debt or deferred inflows of resources should be included in the same net position component (restricted or unrestricted) as the unspent amount.
- Restricted Component of Net Position The restricted component of net position consists of
 restricted assets reduced by liabilities and deferred inflows of resources related to those assets.
 Generally, a liability relates to restricted assets if the asset results from a resource flow that also
 results in the recognition of a liability or if the liability will be liquidated with the restricted assets
 reported.
- Unrestricted Component of Net Position The *unrestricted* component of net position is the net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that are not included in the determination of net investment in capital assets or the restricted component of net position.

In the fund statements, governmental fund equity is classified as fund balance. The Town adopted GASB 54 for the year ended June 30, 2011. As such, fund balances of governmental funds are classified as follows:

- Nonspendable. These are amounts that cannot be spent either, because they are in a nonspendable form or because they are legally or contractually required to be maintained intact.
- Restricted. These are amounts that can be spent only for specific purposes, because of constitutional provisions, enabling legislation or constraints that are externally imposed by creditors, grantors, contributors, or the laws or regulations of other governments.
- Committed. These are amounts that can be used only for specific purposes determined by a formal vote of the Board, which is the highest level of decision-making authority for the Town.
- Assigned. These are amounts that do not meet the criteria to be classified as restricted or committed, but are intended to be used for specific purposes based on the discretion of the Board.
- Unassigned. These are amounts that have not been assigned to other funds and amounts that have
 not been restricted, committed, or assigned to specific purposes within the general fund. Also,
 within other governmental funds, these include expenditure amounts incurred for specific purposes
 which exceed the amounts restricted, committed or assigned for those purposes.

L. Extraordinary and Special Items

Extraordinary items are transactions or events that are both unusual in nature and infrequent in occurrence. Special items are transactions or events within the control of the municipality, which are either unusual in nature or infrequent in occurrence.

M. Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America require management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates.

N. Reconciliations of Government-Wide and Fund Financial Statements

Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net position is presented in Statement D of the basic financial statements. Explanation of certain differences between the governmental fund statement of revenues, expenses, and changes in fund balances and the government-wide statement of activities is presented in Statement F of the basic financial statements.

2. Stewardship, Compliance and Accountability

The Town uses the following budget practices:

- 1. The Town Clerk prepares a proposed budget and submits same to the Mayor and Board of Aldermen no later than fifteen days prior to the beginning of each fiscal year.
- 2. A summary of the proposed budget is published and the public is notified that the proposed budget is available for public inspection. At the same time, a public hearing is called.
- 3. A public hearing is held on the proposed budget at least ten days after publication of the call for the hearing.
- 4. After the holding of the public hearing and completion of all action necessary to finalize and implement the budget, the budget is adopted through passage of an ordinance prior to the commencement of the fiscal year for which the budget is being adopted.
- 5. Budgetary amendments involving the transfer of funds from one department, program or function to another or involving the increase in expenditures resulting from revenues exceeding amounts estimated require the approval of the Board of Aldermen.
- 6. All budgetary appropriations lapse at the end of each fiscal year.
- 7. Budgets for the general and enterprise funds are adopted on a basis consistent with generally accepted accounting principles (GAAP). Budgets for enterprise funds are presented on the accrual basis of accounting. Other governmental funds are presented on

the modified accrual basis of accounting. Accordingly, the budgetary comparison schedules present actual expenditures in accordance with the accounting principles generally accepted in the United States on a basis consistent with the legally adopted budgets as amended. All budgetary amounts presented reflect the original budget and the amended budget (which have been adjusted for legally authorized revisions of the annual budget during the year).

The proposed budget for June 30, 2021 was made available for public inspection and was adopted at the Town's board meeting. The budget was amended.

The street and sidewalk fund were not in compliance with the Local Government Budget Act which stipulate that revenues cannot be under budget by 5% and expenditures cannot be over budget by 5%. The expenditures in the street and sidewalk fund were over budget by 47%. The revenues in the streets and sidewalks fund were over budget by 59%. Revenues in in the general fund were over budget by 3%. Expenditures in the general fund were under budget by 2%.

3. Cash and Cash Equivalents

At June 30, 2021, the Town had the following cash and cash equivalents:

Petty cash	\$ 400
Demand Deposits	823,348
Louisiana Asset Management Pool (LAMP)	2,122
Total	\$ 825,870

These deposits are stated at cost, which approximates market. Under state law, these deposits (or the resulting bank balances) must be secured by federal deposit insurance or the pledge of securities owned by the fiscal agent bank. The market value of the pledged securities plus the federal deposit insurance must at all times equal the amount on deposit with the fiscal agent. These securities are held in the name of the pledging fiscal agent bank in a holding or custodial bank that is mutually acceptable to both parties.

Custodial credit risk as it relates to cash deposits is the risk that in the event of a bank failure, the government's deposits may not be returned. At June 30, 2021, the Town has deposits (collected bank balances) at Investar Bank in the amount of \$864,454. The demand deposits are secured from risk by \$250,000 of federal deposit insurance and \$614,454 of pledged securities. The \$614,454 is exposed to custodial credit risk because while the amount is secured by pledged securities, such securities are held by the custodial bank in the name of the fiscal agent bank (GASB Category 3).

Even though the pledged securities are considered uncollateralized (Category 3) under the provisions of GASB Statement 3, Louisiana Revised Statute 39:1229 imposes a statutory requirement on the custodial bank to advertise and sell the pledged securities within 10 days of being notified by the municipality that the fiscal agent has failed to pay deposited funds upon demand.

Custodial Credit Risk: Custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. The Town does not have a formal policy for custodial risk. However, under state law, these deposits (or the resulting bank balances) must be secured by federal deposit insurance or the pledge of securities owned by the fiscal agent bank.

4. Louisiana Asset Management Pool (LAMP)

In accordance with GASB 72, the investment in the Louisiana Asset Management Pool (LAMP) at June 30, 2021, is not categorized in the three risk categories provided by GASB Codification Section I50.164 because the investment is in the pool of funds and therefore not evidenced by securities that exist in physical or book entry form. The investment in LAMP is stated at the value of the pool shares, which is the same as the fair value. LAMP is administered by LAMP, Inc., a non-profit corporation organized under the laws of the State of Louisiana, which was formed by an initiative of the State Treasurer in 1993. The corporation is governed by a board of directors comprised of the State Treasurer, representatives from various organizations of local government, the Government Finance Office Association of Louisiana, and the Society of Louisiana CPAs. Only local government entities having contracted to participate in LAMP have an investment interest in its pool of assets. The primary objective of LAMP is to provide a safe environment for the placement of public funds in short-term, high quality investments. The LAMP portfolio includes only securities and other obligations in which local governments in Louisiana are authorized to invest.

LAMP is subject to the regulator oversight of the state treasurer and the board of directors. LAMP is not registered with the SEC as an investment company.

While LAMP is not required to be a registered investment company under the Investment Company Act of 1940, its investment policies are similar to those established by Rule 2a7, which governs registered money market funds. The primary objective of LAMP is to provide a safe environment for the placement of public funds in short-term, high quality investments. The LAMP portfolio includes only securities and other obligations in which local governments in Louisiana are authorized to invest in accordance with LSA-R.S. 33:2955.

GASB 40, Deposit and Investment Risk Disclosure, requires disclosure of credit risk, custodial credit risk, concentration of credit risk interest rate risk, and foreign currency risk for all public entity investments.

LAMP is a 2a7 – like investment pool. The following facts are relevant for 2a7 like investment pools:

- 1. Credit risk: LAMP is rated AAAm by Standards and Poor's.
- 2. <u>Custodial credit risk</u>: LAMP participants' investments in the pool are evidenced by shares of the pool. Investments in pools should be disclosed, but not categorized because they are not evidenced by securities that exist in physical or book-entry form. The public entity's investment is with the pool, not the securities that make up the pool; therefore, no disclosure is required.
- 3. <u>Concentration of credit risk</u>: Pooled investments are excluded from the five percent disclosure requirement.
- 4. <u>Interest rate risk</u>: 2a7-like investment pools are excluded from this disclosure requirement per paragraph 15 of the GASB 40 statement. However, LAMP prepares its own interest rate risk

disclosure using the weighted average maturity (WAM) method. The WAM of LAMP assets is restricted to not more than 60 days, and consists of no securities with a maturity in excess of 397 days. The WAM for LAMP's total investments, as provided by LAMP, is 53 days as of June 30, 2021.

5. Foreign currency risk: Not applicable to 2a7-like pools.

LAMP is designed to be highly liquid to give its participants immediate access to their account balances. The investments in LAMP are stated at fair value based on quoted market rates. The fair value is determined on a weekly basis by LAMP and the value of the position in the external investment pool is the same as the net asset value of the pool shares.

LAMP, Inc. is subject to the regulatory oversight of the state treasurer and the board of directors. LAMP is not registered with the SEC as an investment company. LAMP, Inc., issues an annual publicly available financial report that includes financial statements and required supplementary information for LAMP, Inc. That report may be obtained by calling (800) 249-5267.

5. Investments

Investments are categorized into these three categories of credit risk:

- 1. Insured or registered, or securities held by the town or its agent in the Town's name
- 2. Uninsured and unregistered, with securities held by the counterparty's trust department or agent in the Town's name
- 3. Uninsured and unregistered, with securities held by the counterparty, or by its trust department or agent but not in the Town's name

All investments held by the Town fall into category 1 credit risk, defined as "insured or registered, or securities held by the Town or its agent in the Town's name." All investments are stated on the balance sheet (carrying value) at market value. In accordance with GASB 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools, the Town categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

At June 30, 2021, the Town's investment balances were as follows:

		Maturity	C	arrying	Fai	r Market
Investment	Bank	Date	Amount		A	mount
Certificate of Deposit	Investar	7/22/2021	\$	10,000	S	10,000
Certificate of Deposit	Investar	10/6/2021		10,000		10,000
Certificate of Deposit	Investar	11/28/2021		10,000		10,000
Certificate of Deposit	Landmark Bank	3/11/2022		13,484		13,484
	Total		\$	43,484	S	43,484

Interest Rate Risk: The Town does not have a formal investment policy that limits investments maturities as a means of managing its exposure to fair value arising from increasing interest rates.

6. Receivables

Major receivables balances for the governmental activities include sales taxes, franchise taxes, occupational licenses, and fines. Business-type activities report utilities earnings as their major receivable.

In the fund financial statements, material receivables in governmental funds include revenue accruals such as sales tax, franchise taxes, occupational licenses, fines, and other similar intergovernmental revenues since they are usually both measurable and available. Utility accounts receivable comprise the majority of proprietary fund receivables. The Town's utility receivables have a portion in which it does not expect to collect, and therefore an allowance has been placed as shown below.

Allowances for uncollectible accounts receivable are based upon historical trends and the periodic aging and write-off of accounts receivable.

<u>Class</u>	General Fund	Special Revenue Fund	Enterprise Fund	<u>Total</u>
Accounts	\$ -	\$ -	\$ 62,019 \$	62,019
Taxes:				
Franchise	18,188	-	-	18,188
Sales	18,506	14,361	-	32,867
Sub-total	36,694	14,361	-	51,055
Less: Allowance for doubtful accounts		-	(25,095)	(25,095)
Net	36,694	14,361	36,924	87,979

7. Interfund Receivables/Payables

The following is a detailed list of interfund balances for fund financial statements on June 30, 2021:

	Receivable	Payable		
General Fund	***************************************			
Streets and Sidewalks	S 19,011	S -		
Gas	159,652	-		
Water	15,757	-		
Special Revenue Funds				
Streets and Sidewalks				
General Fund	-	19,011		
Gas	-	-		
Water	-	-		
Gas				
Streets and Sidewalks	-	-		
General Fund	-	159,652		
Water	103,972	-		
Water				
Streets and Sidewalks	-	-		
General Fund	-	15,757		
Gas	-	103,972		
Total	\$ 298,392	S 298,392		

8. Restricted Assets

The following is a listing of the restricted assets for the fund financial statements on June 30, 2021:

	Special Special		Special Enterprise		nterprise	
	Rev	enue Fund	nd Fund		 Total	
Sales Tax Account	S	147,275	\$	-	\$ 147,275	
Meter Deposits		-		72,505	72,505	
Revenue bond sinking fund		-		46,845	46,845	
Revenue bond reserve fund		-		65,770	65,770	
Depreciation and contingency fund				76,151	 76,151	
Total restricted assets	S	147,275	\$	261,271	\$ 408,545	

9. Capital Assets

The following is a summary of the changes in capital assets for governmental activities for the fiscal year ended June 30, 2021:

	Beginning Balance Additions			Dedu	ictions	Ending Balance		
Governmental Activities								
Capital Assets, not being depreciated								
Land	_\$_	174,189	\$	75	\$	S.5.	\$	174,189
Capital Assets, being depreciated								
Buildings and improvements		518,985		2				518,985
Less: accumulated deprecation		202,063		12,945		E-		215,008
Net Building and Improvements	25	316,922		(12,945)		36		303,977
Infrastructure		452,848		20				452,848
Less: accumulated deprecation		282,755		22,148				304,903
Net Sidewalks/Drainage		170,093		(22,148)		85		147,945

Total	\$	48,720	\$	576	\$ 57,446	\$ 30,967	\$ 137,709

11. Short Term Obligations

The Town had no short-term debt outstanding at June 30, 2021, other than the current portions of revenue bonds payables and capital leases described in Note 13 *Long-Term Obligations*.

12. Leases

The Town records items under capital leases as an asset and an obligation in the accompanying financial statements. At June 30, 2021, the Town had the following capital leases:

	End o	of Year	Due Within One Year
The Town entered into a lease purchae agreement to purchase a custom pumper truck for a total lease amount of \$80,000. The lease is payable in 10 yearly payments of \$9,862.29. The truck is being depreciated over its estimated useful life. This portion of the lease is recored within the governmental funds as a capital lease in the General fund.	\$	59,199	\$ 7,496
	\$	59,199	\$ 7,496

13. Long-Term Obligations

The following is a summary of long-term obligation transactions for the year ended June 30, 2021:

	Govermental	Activities	Business-	type Activities	Total
	Capital	Revenue	Capital	Revenue	Long-Term
	Leases	Bonds	Leases	Bonds	Obligations
Beginning Balance	66,406	_	_	1,260,490	1,326,896
Additons	-	-	-		-
Retirements	(7,207)	_	_	(77,000)	(84,207)
Ending Balance	59,199	_	_	1,183,490	1,242,689

The following is a summary of the current (due in one year or less) and the long-term (due in more than one year) portions of the long-term obligations:

_	Governmental Activities		В	usiness-type Activ	Total		
	Current	Long Term		Current	Long Term		Long-Term
	Portion	Portion	Total	Portion	Portion	Total	Obligations
Capital Leases	7,496	51,703	59,199	-	-	_	59,199
Revenue Bonds	-	-	-	80,000	1,103,490	1,183,490	1,183,490

Total	59,199	9,837	69,036

14. Flow of Funds: Restrictions on Use-Water Revenue Bonds

Under the terms of the General Bond Ordinances dated November 28, 2007, relative to the \$1,355,000 Water Revenue Refunding Bonds and June 30, 2008, relative to the \$640,523 Water Revenue Bonds, all income and revenues (hereinafter referred to as revenue) of every nature, earned or derived from operation of the water utility system shall be deposited into a Water Revenue Fund, which are pledged and dedicated to the retirement of said bonds, and are to be set aside into the following special funds: Each month, no later than the 20th of the month, the Town is required to transfer 1/12 of that year's debt service from the Water Revenue Fund into the Water Revenue Bond and Interest Sinking Fund. Twice a year, on June 1 and December 1, a withdrawal will be made from the Sinking Fund, principal and/or interest coming due on said dates to the Department of Health and Hospitals (DHH). The Town did make the sinking fund deposits monthly as required by the bond documents.

There shall also be set aside into a "Water Revenue Bond Reserve Fund" an amount equal to one-half (1/2) of the highest annual debt service in any subsequent year. The Reserve Fund should be funded by the Town through monthly installments. Such amount may be used only for the payment of maturing bonds and interest coupons for which sufficient funds are not on deposit in the Water Revenue Bond and Interest Sinking Fund and as to which there would otherwise be default. The account was fully funded at the end of June 30, 2021.

Funds will also be set aside into a 'Water Revenue Bond Depreciation and Contingency Fund" in order to provide an available reserve for extensions, additions, improvements, renewals and replacements necessary

to properly operate the Water System. Money in this fund may be used for emergency situations to get the system repaired and generating revenues as soon as possible after a casualty and for any types of ongoing capital improvements to the water system. The Contingency Fund should be funded by the Town through monthly installments equal to 5% of the previous month's net water revenues, until it contains \$75,000. The account was fully funded at the end of June 30, 2021.

The General Bond Ordinance also contains a rate covenant by which the Town has agreed to maintain its water rates at a level that will always provide net revenues of the system equal to at least 120% of annual debt service on the bonds. The Town did meet the required net revenue requirement. The Town had a net revenue ratio of 148%.

All of the revenues received in any fiscal year and not required to be paid in such fiscal year into any of the above noted funds shall be regarded as surplus and may be used for any lawful corporate purpose.

15. Retirement Systems

Employees of the Town are members of the Municipal Employees Retirement System of Louisiana The Town was a participant of the Municipal Police Employees Retirement System of Louisiana. However, the Town no longer contributions to the police retirement system. These systems are a cost-sharing, multiple-employer public employee retirement system (PERS), controlled and administered by a separate board of trustees.

The Town implemented Governmental Accounting Standards Board (GASB) Statement 68 on Accounting and Financial Reporting for Pensions and Statement 71 on Pension Transition for Contributions Made Subsequent to the Measurement Date—an amendment of GASB 68. These standards require the Town to record its proportional share of each of the pension plans' net pension liability and report the following disclosures:

A. Municipal Employee Retirement System of Louisiana (System)

Plan Description. The System was established and provided for by R.S. 11:1731 of the Louisiana Revised Statutes (LRS). The System provides retirement benefits to employees of all incorporated villages, towns, and cities within the State which do not have their own retirement system and which elect to become members of the system.

Membership is mandatory as a condition of employment beginning on the date employed if the employee is on a permanent basis working at least thirty-five hours per week. Those individuals paid jointly by a participating employer and the parish are not eligible for membership in the System with exceptions as outlined in the statutes.

The System is composed of two distinct plans, Plan A and Plan B, with separate assets and benefit provisions. All employees of the municipality are members of Plan A.

Retirement Benefits:

Benefit provisions are authorized within Act 356 of the 1954 regular session and amended by LRS 11:1756-11:1785. The following brief description is of the plan and its benefits and is provided for general information purposes only. Participants should refer to the appropriate statutes for more complete information.

Any member of Plan A who commenced participation in the System prior to January 1, 2013 can retire providing he meets one of the following criteria:

- 1. Any age with twenty-five (25) years of creditable service.
- 2. Age 60 with a minimum of ten (10) or more years of creditable service.
- 3. Any age with 20 years of creditable service, exclusive of military service and unused annual and sick leave, with an actuarially reduced early benefit.

Generally, the monthly amount of the retirement allowance for any member of Plan A shall consist of an amount equal to three percent of the member's monthly average final compensation multiplied by his years of creditable service. Final average compensation is the average monthly earnings during the highest sixty consecutive months, or joined months if service was interrupted. However, under certain conditions as outlined in the statutes, the benefits are limited to specified amounts.

Any member of Plan A Tier 2 shall be eligible for retirement if he meets one of the following requirements:

- 1. Age 67 with seven (7) years of creditable service.
- 2. Age 62 with ten (10) years of creditable service.
- 3. Age 55 with thirty (30) years of creditable service.
- 4. Any age with twenty-five (25) years of creditable service, exclusive of military service and unused annual and sick leave, with an actuarially reduced early benefit.

The monthly amount of the retirement allowance for any member of Plan A Tier 2 shall consist of an amount equal to three percent of the member's final compensation multiplied by his years of creditable service. Final average compensation is the average monthly earnings during the highest sixty consecutive months, or joined months if service was interrupted. However, under certain conditions as outlined in the statutes, the benefits are limited to specified amounts.

Survivor Benefits:

Upon death of any member of Plan A with five (5) or more years of creditable service, not eligible for normal retirement, the plan provides for benefits for the surviving spouse as outlined in the statutes.

Any member of Plan A who is eligible for normal retirement at time of death and who leaves a surviving spouse will be deemed to have retired and selected Option 2 benefits on behalf of the surviving spouse on the date of death. Such benefits will begin only upon proper application and are paid in lieu of any other survivor benefits.

DROP Benefits:

In lieu of terminating employment and accepting a service retirement allowance, any member of Plan A or B who is eligible to retire may elect to participate in the deferred retirement option plan (DROP) for up to three years and defer the receipt of benefits. During participation in the plan, employer contributions are payable but employee contributions cease. The monthly retirement benefits that would be payable, had the person elected to cease employment and receive a service retirement allowance, are paid into the DROP Fund. Interest is earned when the member has completed DROP participation. Interest earnings are based upon the actual rate of return on the investments identified as DROP funds for the period. In addition, no cost-of-living increases are payable to participants until employment which made them eligible to become members of the System has been terminated for at least one full year.

Upon termination of employment prior to or at the end of the specified period of participation, a participant in the DROP may receive, at his option, a lump sum from the account equal to the payments into the account, a true annuity based upon his account balance in that fund, or any other method of payment if approved by the board of trustees. If a participant dies during the participation in the DROP, a lump sum equal to the balance in his account shall be paid to his named beneficiary or, if none, to his estate. If employment is not terminated at the end of the three years, payments into the DROP fund cease and the person resumes active contributing membership in the System.

Disability Benefits:

For Plan A, a member shall be eligible to retire and receive a disability benefit if he has at least five years of creditable service, is not eligible for normal retirement, and has been officially certified as disabled by the State Medical Disability Board. Upon retirement caused by disability, a member of Plan A shall be paid a disability benefit equal to the lesser of (1) an amount equal to three percent of his final compensation multiplied by his years of creditable service, but not less than forty-five percent of his final compensation, or (2) an amount equal to what the member's normal retirement benefit would be based on the member's current final compensation, but assuming the member remained in continuous service until his earliest normal retirement age and using those retirement benefit computation factors which would be applicable to the member's normal retirement.

<u>Cost of Living Increases:</u>

The System is authorized under state law to grant a cost of living increase to members who have been retired for at least one year. The adjustment cannot exceed 2% of the retiree's original benefit for each full calendar year since retirement and may only be granted if sufficient funds are available from investment income in excess of normal requirements. State law allows the System to grant an additional cost of living increase to all retirees and beneficiaries who are age sixty-five and above equal to 2% of the benefit being received on October 1, 1977, or the original benefit, if retirement commenced after that date.

Deferred Benefits:

Both Plans provide for deferred benefits for members who terminate before being eligible for retirement. Once the member reaches the appropriate age for retirement; benefits become payable. Benefits are based on statutes in effect at time of withdrawal.

The System issues an annual publicly available financial report that includes financial statements and required supplemental information for the System. That report may be obtained by writing to the Municipal Employees Retirement System of Louisiana, 7937 Office Park Boulevard, Baton Rouge, Louisiana 70809, or calling (225) 925-4810 or at www.mersla.com.

Funding Policy. Under Plan A, members are required by state statute to contribute 10.00% of their annual covered salary and the Town of Slaughter is required to contribute at an actuarially determined rate. The current rate is 29.50% of annual covered payroll. Contributions to the System also include one-fourth of one percent (except Orleans) of the taxes shown to be collectible by the tax rolls of each parish. Tax monies are apportioned between Plan A and Plan B in proportion to salaries of plan participants. Tax monies received from East Baton Rouge Parish are apportioned between the Municipal Employees' Retirement System and the Employees' Retirement System of the City of Baton Rouge. The System also receives revenue sharing funds each year as appropriated by the Legislature. These additional sources of income are used as additional employer contributions and considered support from non-employer contributing entities, but are not considered special funding situations. Non-employer contributions are recognized as revenue and excluded from pension expense for the year ended June 30, 2021. During the

year ending June 30, 2021, the Town recognized revenue as a result of support received from non-employer contributing entities of \$5,479 for its participation in MERS-Plan A.

The Town's contributions to the System under Plan A for the years ending June 30, 2021 and 2020 were \$42,895, and \$42,046, respectively, equal to the required contributions for each year.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions: At June 30, 2021, the Town reported a liability of \$204,251 for its proportionate share of the net pension liability of the System. The net pension liability was measured as of June 30, 2021 and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The Town's proportion of the net pension liability was based on a projection of the Town's long-term share of contributions to the pension plan relative to the projected contribution of all participating, actuarially determined. At June 30, 2021, the Town's proportion was 0.0734319%, which was a decrease of 0.011177% from its proportion measured as of June 30, 2020.

For the year ended June 30, 2021, the Town recognized pension expense for the MERS System of \$41,732 representing its proportionate share of the System's net expense, including amortization of deferred amounts.

At June 30, 2021, the Town reported deferred outflows of resources and deferred inflows of resources related to the MERS pension system from the following sources:

	 ed Outflows Lesources	Def	erred Inflows of Resources
Differences between expected and actual experience	\$ 74	\$	(2,335)
Changes of Assumptions	7,464		-
Net difference between projected and actual earnings on pension plan investments	-		(57,548)
Changes in proportion and differences between Employer contributions and proportionate share of contributions	22,695		(30,094)
Employer contributions subsequent to the measurement date	_		-
Total	\$ 30,233	\$	(89,977)

The Town reported a total of \$0 as deferred outflow of resources related to pension contributions made subsequent to the measurement period of June 30, 2021 which will be recognized as a reduction in net pension liability in the year ended June 30, 2021.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

<u>Year</u>	
2022	\$ (17,213)
2023	(18,306)
2024	(14,836)
2025	 (19,480)
	\$ (69,836)

Actuarial Assumptions. A summary of the actuarial methods and assumptions used in determining the total pension liability as of June 30, 2021 is as follows:

Valuation Date June 30, 2021 Actuarial Cost Method Entry Age Normal

Actuarial Assumptions:

Expected Remaining Service Lives 3 years

Investment Rate of Return 6.85%, net of pension plan investment expense, including

Inflation.

Inflation Rate 2.5%

Salary increases, including Inflation and merit increases:

-1 to 4 years of service 6.4%-Plan A and 7.4% Plan B

-More than 4 years of

Service 4.5%-Plan A and 4.9% Plan B

Annuitant and beneficiary mortality PubG-2010(B) Healthy Retiree Table set to equal to 120%

For males and females, each adjusted using their

respective male and female MP2018 scales.

Employee mortality PubG-2010(B) Healthy Retiree Table set to equal to 120%

For males and females, each adjusted using their

respective male and female MP2018 scales.

Disabled lives mortality PubG-2010(B) Healthy Retiree Table set to equal to 120%

For males and females, with the full generational MP2018

scales.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimates ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation and an adjustment for the effect of rebalancing/diversification.

Best estimates of arithmetic real rates of return for each major asset class included in the System's target asset allocation as of June 30, 2021 are summarized in the following table:

		Long-Term
		Expected
	Target Asset	Portfolio Real
Asset Class	Allocation	Rate of Return
-		
Public Equity	53%	2.31%
Public Fixed Income	38%	1.65%
Alternatives	9%	0.39%
Totals	100%	4.35%
Inflation	-	2.60%
Expected Arithmetic Nominal Rate		6.95%

The discount rate used to measure the total pension liability was 6.85%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rates and that contributions from participating employers will be made at the actuarially determined rates which are calculated in accordance with relevant statutes and approved by the Board of Trustees and the Public Retirement Systems' Actuarial Committee. Based on those assumptions, the System's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

The effects of certain other changes in the net pension liability are required to be included in pension expense over the current future periods. The effects on the total pension liability of (1) changes of economic and demographic assumptions or of other inputs and (2) differences between expected and actual experience are required to be included in pension expense in a systematic and rational manner over a closed period equal to the average of the expected remaining service lives of all employees that are proved with benefits through the pension plan (active employees and inactive employees), determined as of the beginning of the measurement period. The effect on net pension liability of differences between the projected earning on pension plan investments and actual experience with regard to those earnings is required to be included in pension expense in a systematic and rational manner over a closed period of five years, beginning with the current period. The Expected Remaining Service Lives (ERSL) for 2021 is 3 years for Plan A and B.

Sensitivity of the Employer's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate. The following presents the net pension liability of the participating employers calculated using the discount rate of 6.85%, as well as what the employers' net pension liability would be if it were calculated using a discount rate that is one percentage point lower, or one percentage point higher than the current rate as of June 30, 2021:

	Current			
	1% Decrease	Discount Rate	1% Increase	
Rates	5.850%	6.850%	7.850%	
Town of Slaughter Share of NPL	S 302,507	\$ 204,251	S 121,261	

Payable to the Pension Plan. At June 30, 2021, the Town reported a payable of \$9,389 for outstanding contributions to the pension plan required for the year ended June 30, 2021.

B. Municipal Police Employees Retirement System of Louisiana (System)

Plan Description. The Municipal Police Employees' Retirement System (System) is a cost-sharing multiple-employer defined benefit pension plan established by Act 189 of 1973 to provide retirement, disability, and survivor benefits to municipal police officers in Louisiana.

Membership is mandatory for any full-time police officer employed by a municipality of the State of Louisiana and engaged in law enforcement, empowered to make arrest, providing he does not have to pay social security and providing he meets the statutory criteria.

Retirement Benefits:

Benefit provisions are authorized within Act 189 of 1973 and amended by LRS 11:2211-11:2233. The following is a brief description of the plan and its benefits and is provided for general information purposes only. Participants should refer to the appropriate statutes for more complete information.

Membership Prior to January 1, 2013: A member is eligible for regular retirement after he has been a member of the System and has 25 years of creditable service at any age or has 20 years of creditable service and is age 50 or has 12 years creditable service and is age 55. A member is eligible for early retirement after he has been a member of the System for 20 years of creditable service at any age with an actuarially reduced benefit.

Benefit rates are three and one-third percent of average final compensation (average monthly earnings during the highest 36 consecutive months or joined months if service was interrupted) per number of years of creditable service not to exceed 100% of final salary.

Upon the death of an active contributing member, or disability retiree, the plan provides for surviving spouses and minor children. Under certain conditions outlined in the statutes, the benefits range from forty to sixty percent of the member's average final compensation for the surviving spouse. In addition, each child under age eighteen receives benefits equal to ten percent of the member's average final compensation or \$200 per month, whichever is greater.

Membership Commencing January 1, 2013: Member eligibility for regular retirement, early retirement, disability and survivor benefits are based on Hazardous Duty and Non Hazardous Duty sub plans. Under the Hazardous Duty sub plan, a member is eligible for regular retirement after he has been a member of the System and has 25 years of creditable service at any age or has 12 years of creditable service at age 55.

Under the Non Hazardous Duty sub plan, a member is eligible for regular retirement after he has been a member of the System and has 30 years of creditable service at any age, 25 years of creditable service at age 55, or 10 years of creditable service at age 60. Under both sub plans, a member is eligible for early retirement after he has been a member of the System for 20 years of creditable service at any age, with an actuarially reduced benefit from age 55.

Under the Hazardous and Non Hazardous Duty sub plans, the benefit rates are three percent and two and a half percent, respectively, of average final compensation (average monthly earnings during the highest 60

consecutive months or joined months if service was interrupted) per number of years of creditable service not to exceed 100% of final salary.

Upon death of an active contributing member, or disability retiree, the plan provides for surviving spouses and minor children. Under certain conditions outlined in the statues, the benefits range from twenty-five to fifty-five percent of the member's average final compensation for the surviving spouse. In addition, each child under age eighteen receives ten percent of average final compensation or \$200 per month whichever is greater. If deceased member had less than ten years of service, beneficiary will receive a refund of employee contributions only.

Cost of Living Adjustments:

The Board of Trustees is authorized to provide annual cost-of-living adjustments computed on the amount of the current regular retirement, disability, beneficiary or survivor's benefit, not to exceed 3% in any given year. The Board is authorized to provide an additional 2% COLA, computed on the member's original benefit, to all regular retirees, disability, survivors and beneficiaries who are 65 years of age or older on the cut-off date which determines eligibility.

No regular retiree, survivor or beneficiary shall be eligible to receive a cost-of-living adjustment until benefits have been received at least one full fiscal year and the payment of such COLA, when authorized, shall not be effective until the lapse of at least one-half of the fiscal year. Members who elect early retirement are not eligible for a cost-of-living adjustment until they reach regular retirement age.

A COLA may only be granted if funds are available form interest earnings in excess of normal requirements, as determined by the actuary.

Deferred Retirement Option Plan:

A member is eligible to elect to enter the deferred retirement option plan (DROP) when he is eligible for regular retirement based on the members' sub plan participation. Upon filing the application for the program, the employee's active membership in the System is terminated. At the entry date into the DROP, the employee and employer contributions cease. The amount to be deposited into the DROP account is equal to the benefit computed under the retirement plan elected by the participant at date of application. The duration of participation in the DROP is thirty-six months or less. If employment is terminated after the three-year period the participant may receive his benefits by lump sum payment or a true annuity. If employment is not terminated, active contributing membership into the System shall resume and upon later termination, he shall receive additional retirement benefit based on the additional service. For those eligible to enter DROP prior to January 1, 2004, DROP accounts shall earn interest subsequent to the termination of DROP participation at a rate of half of one percentage point below the percentage rate of return of the System's investment portfolio as certified by the actuary on an annual basis but will never lose money. For those eligible to enter DROP subsequent to January 1, 2004, an irrevocable election is made to earn interest based on the System's investment portfolio return or a money market investment return. This could result in a negative earnings rate being applied to the account. If the member elects a money market investment return, the funds are transferred to a government money market account.

Initial Benefit Option Plan:

In 1999, the State Legislature authorized the System to establish an Initial Benefit Option program. Initial Benefit Option is available to members who are eligible for regular retirement and have not participated in DROP. The Initial Benefit Option program provides both a one-time single sum payment of up to 36 months of regular monthly retirement benefit, plus a reduced monthly retirement benefit for life. Interest is

computed on the balance based on same criteria as DROP. Statutes should be read for more detail on eligibility and benefit provisions.

The System issues an annual publicly available financial report that includes financial statements and required supplemental information for the System. That report may be obtained by writing to the Municipal Police Employees Retirement System of Louisiana, 8401 United Plaza Boulevard, Baton Rouge, Louisiana 70809-2250, or by calling (225) 929-7411 or at www.lampers.org.

Funding Policy. According to state statute, the Town is required to contribute at an actuarially determined rate but cannot be less than 9% of the employee's earnable compensation excluding overtime but including state supplemental pay. For the year ended June 30, 2021, total contributions due for employers and employees were 43.75%. The employer and employee contribution rates for members hired prior to January 1, 2013 and Hazardous Duty members hired after January 1, 2013 were 33.75% and 10%, respectively. The employer and employee contribution rates for all Non-Hazardous Duty members hired after January 1, 2013 were 33.75% and 8%, respectively. The employer and employee contribution rates for members whose earnable compensation is less than or equal to poverty guidelines issued by the U.S. Department of Health and Human Services were 36.25% and 7.50%, respectively.

The System also receives insurance premium tax monies as additional employer contributions and considered support from a non-contributing entity. This tax is appropriated by the legislature each year based on an actuarial study. This additional source of income is used as additional employer contributions and considered support from non-employer contributing entities, but is not considered a special funding situation. Non-employer contributions are recognized as revenue and excluded from pension expense for the year ended June 30, 2021. The Town had \$1,149 in non-employer contributions for the year.

The Town contributed \$9,905 and \$0 funds to the System for the years ending October 31, 2021 and 2020 respectively.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions: At June 30, 2021, the Town reported \$27,404 in net pension liability for its proportionate share of the net pension liability of the System. The net pension liability was measured as of June 30, 2021 and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The Town's proportion of the net pension liability was based on a projection of the Town's long-term share of contributions to the pension plan relative to the projected contribution of all participating, actuarially determined. At June 30, 2021, the Town's proportion was 0.005141%, which was a decrease of 0.005141% from its proportion measured as of June 30, 2020.

For the year ended June 30, 2021, the Town recognized pension expense for the MPERS System of \$11,327 representing its proportionate share of the System's net expense, including amortization of deferred amounts.

At June 30, 2021, the Town reported deferred outflows of resources and deferred inflows of resources related to the MPERS pension system from the following sources:

	 ed Outflows Resources	 ed Inflows of esources
Differences between expected and actual experience	\$ -	\$ (844)
Changes of Assumptions	3,035	(782)
Net difference between projected and actual earnings on pension		
plan investments	-	(12,796)
Changes in proportion and differences between Employer		
contributions and proportionate share of contributions	36,255	
Employer contributions subsequent to the measurement date	-	-
Total	\$ 39,290	\$ (14,422)

The Town reported a total of \$0 deferred outflow of resources related to pension contributions made subsequent to the measurement period of June 30, 2021.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

<u>Year</u>	
2022	\$ 44,883
2023	12,086
2024	33,950
2025	=
	\$ 90,918

Actuarial Assumptions. A summary of the actuarial methods and assumptions used in determining the total pension liability as of June 30, 2021, is as follows:

Valuation Date	June 30, 2021
Actuarial Cost Method	Entry Age Normal

Actuarial Assumptions:

Investment Rate of Return 6.750%, net of investment expense

Expected Remaining Service Lives 2018, 2019, 2020 and 2021-4 years

Inflation Rate 2.50%

	Years of Service	Salary Growth Rate
Salary increases, including inflation and merit	1-2 Above 2	12.30% 4.70%

Mortality For annuitants and beneficiaries, the Pub-2010 Public

Retirement Plan Mortality Table for Safety Below-Median Healthy Retirees multiplied by 115% for males and 125% for females, each with full generational projection using

the MP2019 sale was used.

For disable lives, the Pub-2010 Public Retirement Plans Mortality Table for Safety Disable Retirees multiplied by 105% for males and 115% for females, each with full generational projection using the MP2019 scale was used.

For employees, the Pub-2010 Public Retirement Plans Mortality Table for Safety Below-Median Employees multiplied by 115% for males and 125% for females, each full generational projecting using the MP2019 scale was used.

Cost of Living Adjustments

The present value of future retirement benefits is based on benefits currently being paid by the System and includes previously granted cost-of-living increases. The present values do not include provisions for potential future increases not yet authorized by the Board of Trustees.

The mortality rate assumption used was set based upon an experience study for the period of July 1, 2014 through June 30, 2019. A change was made full generational mortality which combines the use of a base mortality table with appropriate mortality improvement scales. In order to set the base mortality table, actual plan mortality experience was assigned a credibility weighting and combined with a standard table to produce current levels of mortality.

Best estimates of arithmetic nominal rates of return for each major asset class included in the System's target asset allocation as of June 30, 2021, are summarized in the following table:

	Long-Term
	Expected
Target Asset	Portfolio Real
Allocation	Rate of Return
55.50%	3.47%
30.50%	0.59%
14.00%	1.01%
0.00%	0.00%
100.00%	5.08%
	2.22%
	7.30%
	Allocation 55.50% 30.50% 14.00% 0.00%

The discount rate used to measure the total pension liability was 6.750%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rates and that contributions from participating employers will be made at the actuarially determined rates approved by PRSAC taking into consideration the recommendation of the System's actuary. Based on those assumptions, the System's fiduciary net position was projected to be available to

make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Employer's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate. The following presents the net pension liability of the participating employers calculated using the discount rate of 6.750%, as well as what the employers' net pension liability would be if it were calculated using a discount rate that is one percentage point lower, or one percentage point higher than the current rate as of June 30, 2021:

			(Current		
	1%	Decrease	_Disc	count Rate	1%	Increase
Rates		5.750%		6.750%		7.750%
Town of Slaughter Share of NPL	\$	47,761	S	27,404	\$	10,413

Payable to the Pension Plan. At June 30, 2021, the Town reported a payable of \$6,468 for outstanding contributions to the pension plan required for the year ended June 30, 2021.

16. Interfund Transfers

Interfund transfers for the year ended June 30, 2021, consisted of the following. The principal purpose of the transfers between funds is to fund expenditures associated with those funds.

	Tra	nsfers In	Transfers Out			
General Fund						
Streets and Sidewalks	S	58,831	S	-		
Water		52,000		-		
Gas		103,000		-		
Special Revenue Funds						
Streets and Sidewalks						
General Fund		=		58,831

Gas		-		-		
Enterprise Fund						
Streets and Sidewalks		-		-		
General Fund		-		155,000		
Total	S	213,831	S	213,831		

17. Purchase of Pumper Truck

On August 18, 2017, the Town of Slaughter entered into a lease purchase agreement for the acquisition of a 2017 custom pumper truck. The total purchase price was \$481,984. The acquisition was handled in three transactions:

- 1) The Slaughter Volunteer Fire Department, Inc., a 501(c)4 organization, received a Pennington Foundation grant for \$350,000. These funds were used to acquire the truck.
- 2) The Slaughter station under the Parish-Wide East Feliciana Fire District umbrella paid \$52,923.90 towards the truck.
- 3) The remainder of \$80,000 owed was financed through a lease purchase agreement with the Town of Slaughter named as the lessee. The lease terms are yearly payments of \$9,862.29 commencing on August 18, 2018 and ending on August 18, 2027.

The lease will be paid with the Slaughter station Parish-Wide East Feliciana Fire District account each year as the payments are due. A copy of the title was obtained. The purchaser is labeled as the Town of Slaughter and the lienholder is Patterson State Bank. The Town has recorded the asset and related capital payable on the financial statements. As the payments are made with District funds, the Town will reduce the liability and record the payment as revenue. During the fiscal year of June 30, 2021, principal payments of \$7,207 and interest payments of \$2,655 were paid. The Town recognized \$9,862 in capital transfers from the Parish-wide Fire District.

18. Fund Balances and Net Position

The General Fund has assigned fund balance for police protection in the amount of \$33,858. The Restricted fund balance is \$142,048. This is restricted due to legislation for sales taxes for streets and sidewalks. The unassigned fund balance in the governmental funds is \$398,581. The Enterprise Fund had restricted net position for customer deposits in the amount of \$72,505 and for debt service accounts as required by bond covenants in the amount of \$188,766. The Enterprise Fund has net position that is investment in capital assets net of related debt in the amount of \$151,244. The Enterprise Fund has unrestricted net position of (\$213,456).

19. On-Behalf Payments

For the fiscal year ended June 30, 2021, the State of Louisiana made on behalf payments in the form of supplemental pay to the Town's policemen. In accordance with GASB 24, the Town recorded \$17,150 of on behalf payments as revenue and as an expenditure in the General Fund.

20. Risk Management

The Town is exposed to various risks of loss related to theft, damage, or destruction of assets, torts, injuries, natural disasters, and many other unforeseeable events. The Town purchases commercial insurance policies and bonds for any and all claims related to the aforementioned risks. The Town's payment of the insurance policy deductible is the only liability associated with these policies and bonds. There has been no significant decrease in insurance coverage from the prior year, and the amount of settlements has not exceeded the insurance coverage for the past three fiscal years.

21. Contingent Liabilities

At June 30, 2021, the Town was not involved in any outstanding litigation or claims.

22. Commitments

The Town received \$45,000 in grant funding for new computer equipment. The Town spent \$19,832 during June 30, 2021 and accrued \$11,089 at year end for acquisitions.

23. COVID 19 Pandemic

In January 2021, the World Health Organization declared the outbreak of a novel coronavirus (COVID-19) as a "Public Health Emergency of International Concern," which has spread throughout the world and has adversely impacted global commercial activity and contributed to significant declines and volatility in financial markets. The outbreak could have a continued material adverse impact on economic and market conditions. There continues to be no prediction as to the ultimate material adverse impact of the coronavirus outbreak. Nevertheless, the outbreak presents uncertainty and risk with respect to the District and its financial results.

24. Subsequent Events

On June 15, 2021, the Town authorized a resolution to proceed with the issuance of not to exceed \$1,425,000 of Water Revenue Refunding Bonds. The outstanding bonds will refund in all or a portion through the issuance of refunding bonds. The agreement is still subject to the approval of the State Bond Commission.

On July 20, 2021, the Town passed resolution 2-2021 change from Plan A to Plan B provisions of the Municipal Employees Retirement System of Louisiana. The resolution took effect July 19, 2021. The System accepted the boards resolution on August 19, 2021.

On March11, 2021, as a result of COVID-19, the American Rescue Care Plan was signed into law. This Plan will provide financial assistance to local municipalities, including the Town, for certain allowable expenditures as stated in the Plan. The Town may be eligible for up to \$335,086 in financial assistance from the Plan.

Management has evaluated subsequent events through February 23, 2022, the date on which the financial statements where available to be issued. No other events were noted that require recording or disclosure in the financial statements for the fiscal year ending June 30, 2021.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

The Honorable Robert Jackson, Mayor And Members of the Board of Aldermen PO Box 293 Slaughter, LA

I have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Slaughter, State of Louisiana, as of and for the year ended June 30, 2021, and the related notes to the financial statements, which collectively comprise the Town of Slaughter 's basic financial statements and have issued our report thereon dated February 22, 2022

Internal Control over Financial Reporting

In planning and performing my audit of the financial statements, I considered the Town of Slaughter's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Town of Slaughter's internal control. Accordingly, I do not express an opinion on the effectiveness of the Town of Slaughter's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

My consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during my audit I did not identify any deficiencies in internal control that I consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Town of Slaughter's financial statements are free from material misstatement, I performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of my audit, and accordingly, I do not express such an opinion. The results of my tests disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and which are described in the accompanying schedule of findings and responses as items 2021-001 and 2021-002.

Town of Slaughter's Response to Findings

minda Raybolun

Town of Slaughter's response to the findings identified in our audit is described in the accompanying schedule of findings and responses. Town of Slaughter's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, I express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of my testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

A management letter was not issued.

TOWN OF SLAUGHTER, LOUISIANA SCHEDULE OF CURRENT YEAR FINIDNGS AND RESPONSES FOR THE YEAR ENDED JUNE 30, 2021

Finding 2020-001 Noncompliance with Local Government Budget Act

CONDITION: The special revenue fund (street and sidewalk fund) expenditures were over budget 47% or \$15,166.

CRITERIA: Per R.S. 39:1311 (Local Government Budget Act), the governing authority must adopt a budget amendment if there is a 5% or greater shortage in revenue or a 5% or greater overage in expenditures if there is a 5% or greater variance in the actual fund balance at the beginning of the year. This applies to the entity's general fund and special revenue funds

CAUSE OF CONDITION: While the Town did amend its general fund and special revenue fund budgets, expenditures and other uses were over the legal threshold of 5%. In addition, it appears a budget message was not prepared.

POTENTIAL EFFECT OF CONDITION: Noncompliance with the Local Government Budget Act.

RECOMMENDATION: The Town needs to ensure its amended expenditures and revenues are within the 5% requirement before the year ends.

CLIENT RESPONSE: We agree with the auditor's recommendation.

CONTACT PERSON: Janis Landry, Mayor, 3377 Church Street, Slaughter, LA 70777, (225) 654-4278

Finding 2020-002 Filing of Federal Payroll Reports

CONDITION: The employer's quarterly federal tax return for quarters (form 941) ending March 31 2021 and June 30, 2021 were not filed.

CRITERIA: The employer's quarterly federal tax return is due every quarter or every three months.

CAUSE OF CONDITION: The reports were not filed timely.

POTENTIAL EFFECT OF CONDITION: The Internal Revenue Service will assess penalties for non-filing or late filing of employer's quarterly federal tax returns.

RECOMMENDATION: The Town needs to put procedures in place to ensure the timely filing of the quarterly federal tax return. The quarterly deadlines need to be noted on calendars and mailing of the returns with certified return receipt or electronic filing of the returns.

CLIENT RESPONSE: We agree with the auditor's recommendation.

CONTACT PERSON: Janis Landry, Mayor, 3377 Church Street, Slaughter, LA 70777, (225) 654-4278.

TOWN OF SLAUGHTER, LOUISIANA SCHEDULE OF PRIOR YEAR FINDINGS AND RESPONSES FOR THE YEAR ENDED JUNE 30, 2019

INTERNAL CONTROL FINDINGS

Finding 2021-001 Customer Meter Deposits

CONDITION: Meter deposits that are in the town's utility billing system are not being reconciled liabilities reflected on the town's accounting records.

CRITERIA: Customer meter deposits are recorded on the accounting system as a liability. The utility billing system as part of the town's internal controls has a report that details the customer deposits for each account for water and gas customers. Both the report per the utility billing system and the general ledger should be reconciled for these deposits.

CAUSE OF CONDITION: Lack of internal controls over customer deposits.

POTENTIAL EFFECT OF CONDITION: If the town's utility customer deposits are not reconciled, there will be discrepancies between the accounting and utility billing system.

RECOMMENDATION: The town should reconcile the utility billing system and accounting system for customer deposits to ensure customer deposits paid and refunded and customer deposit liabilities are balanced.

CLIENT RESPONSE: We agree with the auditor's recommendation.

STATUS: Resolved.

COMPLIANCE FINDINGS

FINDING 2021-002 Public Bid Law

CONDITION: The town purchased three police vehicles. Two were purchased on state contract. One vehicle was purchased for \$34,010.00. The vehicle was not purchased on state contract nor publicly bid.

CRITERIA: The provisions of the public bid law, R.S. Title 38:2211-2296, state that

- A) All public works purchases exceeding \$250,000 must be publicly bid.
- B) All material and supply purchases exceeding \$30,000 must be publicly bid.

There are exceptions for certain purchases of materials and supplies. These exceptions include:

- purchases off the State Contract under cooperative purchasing agreements; R.S. 38:2212.1(F)
- purchases of surplus materials and supplies from another public entity or the government of the United States or if the particular transaction is governed by the procurement code; R.S. 38:2212.1(D)
- purchases off of the Federal General Services Administration Lists, provided that the items are not otherwise available cheaper on State Contract and the public entity utilizes a Louisiana licensed dealer or distributor; R.S. 38:2212.1(E)
- purchases by hospitals service districts under qualified group purchasing organizations; R.S.38:2212.1(G)

TOWN OF SLAUGHTER, LOUISIANA SCHEDULE OF PRIOR YEAR FINDINGS AND RESPONSES FOR THE YEAR ENDED JUNE 30, 2019

- purchases of used fire and emergency response vehicles, including associated equipment, with a per unit purchase cost of less than one hundred thousand dollars; R.S. 38:2238, et seq.
- lease, rental, or purchases of telecommunications data processing systems, including equipment, and related services, by political subdivisions through a request for proposals; R.S. 38:2237
- purchases of materials, equipment and supplies by school districts and schools through a qualified group purchasing organization; R.S. 38:2212.1(N)
- purchase of materials, supplies, vehicles or equipment by the State, any levee district, levee drainage district, municipality, parish or other political subdivision of the state through an existing public contract of another political subdivision within one year of the opening of bids; R.S. 38:321.1; and
- purchases of animals trained to perform special task, including but not limited to narcotics detection, bomb detection, arson investigation, and rescue techniques by: Any local law enforcement agency for the principal purpose of aiding in the detection of criminal activity, enforcement of laws, or apprehension of offenders, and Any local public safety agency for the purpose of search and rescue services

CAUSE OF CONDITION: Lack of understanding of the state public bid law and lack of controls over purchases subject to the state public bid law.

POTENTIAL EFFECT OF CONDITION: Noncompliance with state public bid law.

RECOMMENDATION: Management needs to review the policies and procedures in place regarding contracts and purchasing. Management needs to incorporate into its financial policies and procedures controls over purchases subject to public bid law.

CLIENT RESPONSE: We agree with the auditor's recommendations.

STATUS: Resolved.

FINDING 2021-003 Compliance with Bond Agreement Terms

CONDITION: The Town had a net revenue ratio of 92.55% on the debt for the water system.

CRITERIA: The General Bond ordinance contains a rate covenant by which the Town has agreed to maintain its water rates at a level that will provide net revenues of the system equal to at least 120% of annual debt service on the bonds.

CAUSE OF CONDITION: The Town's water fund had a loss for the fiscal year of (\$131,716).

POTENTIAL EFFECT OF CONDITION: Noncompliance with the Town's bond agreement.

RECOMMENDATION: The Town should consider a rate study for all utilities to ensure that the Town's revenue will cover the utility expense and to ensure the bond covenants are complied with.

CLIENT RESPONSE: We agree with the auditor's recommendation.

STATUS: Resolved.

TOWN OF SLAUGHTER, LOUISIANA SCHEDULE OF PRIOR YEAR FINDINGS AND RESPONSES FOR THE YEAR ENDED JUNE 30, 2019

Finding 2021-004 Compliance with Local Government Budget Act

CONDITION: The general fund expenditures and other financing uses were over budget by 9.54% or \$72,546. The street and side walk fund (special revenue fund) expenditures and other financing uses were

over budget by 18.34% or \$37,289.

The Town also did not provide the budget message that must accompany the proposed budget.

CRITERIA: Per R.S. 39:1311 (Local Government Budget Act), the governing authority must adopt a budget amendment if there is a 5% or greater shortage in revenue or a 5% or greater overage in expenditures if there is a 5% or greater variance in the actual fund balance at the beginning of the year.

This applies to the entity's general fund and special revenue funds.

The Act also requires a budget message that is signed and that contains the following:

-a summary of description of the proposed financial plan, policies, and objectives, assumptions, budgetary

basis, and,

-a discussion of the most important features.

CAUSE OF CONDITION: While the Town did amend its general fund and special revenue fund budgets, expenditures and other uses were over the legal threshold of 5%. In addition, it appears a budget

message was not prepared.

POTENTIAL EFFECT OF CONDITION: Noncompliance with the Local Government Budget Act.

RECOMMENDATION: The Town needs to ensure its amended expenditures and revenues are within the 5% requirement before the year ends. In addition, it must incorporate a budget message with the

prepare proposed budget.

CLIENT RESPONSE: We agree with the auditor's recommendation.

STATUS: Partially resolved.
